Uranus
discovered by
William Herschel
has a
Ring System
made of
10 Rings
discovered during an
Occultation
has
27 Moons
the most interesting is
Miranda
due to its
Highly Disturbed Terrain
axis is tilted
98 Degrees
which results in
Seasons that are 21 years long
Days and nights that are 42 years long
has a
Rocky Core surrounded by Ammonia, Methane and Water
the liquid portion is referred to as
Ionic Slush
has
Fast Rotation
has a
Magnetic Field
produced by
has an
Outer Layer of Liquid Hydrogen and Helium
has a
Thin Atmosphere of Hydrogen, Helium and Methane
blue-green color caused by
Methane
Neptune
has a
Rocky Core surrounded by Ammonia, Methane and Water
has
Fast Rotation
has a
Ionic Slush
has a
Magnetic Field
has an
Outer Layer of Liquid Hydrogen and Helium
has a
Thin Atmosphere of Hydrogen, Helium and Methane
has a
Ring System
has
13 Moons
the largest is
Triton
has a
Retrograde Orbit
has
Nitrogen Geysers
discovered by
Adams and Leverrier
using
Newton's Laws of Motion
